Words To Live By

The past fifteen chapters have explained certain precepts of Gnostic philosophical wisdom. Hopefully, the explanations went into sufficient detail to be understood. When one writes dogma the tendency is to write more detail than is necessary. This book has gone to sufficient detail to fully explain a vast amount of Gnostic doctrine.

Still, there are those who appreciate beauty of simplicity. For you, the following is a summarization of a few key precepts.

1. Our spirits are energy that will one day reintegrate into the great cosmos. Thus, it is on Earth that we reap our fortunes or suffer our consequences, and nowhere else.
2. There is life in everything and everything is connected.
3. Energy cannot be destroyed, it can only be altered.
4. Life is trapped energy.
5. Death is only a transition from one form of existence to another.
6. Because everything is connected it shares the knowledge of all experience and observation.
7. Gnosis occurs when we begin to realize what we have been, what we are, and our purpose for being.
8. Because each layer of space-time can be superimposed over the other, there exist parallel universes that provide infinite possibilities.
9. Thought is the means by which we can observe, interact, control and affect change within our universe.
10. Thought is the substance of immortality.
11. The key to controlling your mind is to first understand yourself.

12. Energy has no concept of right or wrong - it simply is.
13. When values of right and wrong, good and evil are removed, society will only be governed by the laws of action and reaction.
14. A Gnostic's first responsibility is to himself or herself.
15. The Gnostic never "expects" anything from anyone.
16. All we need to do is put a light in the window. When they are ready, they will ask why.
17. Sheep are much easier to control when they remain ignorant and afraid, because they feel safe only when they are surrounded by their own kind who are just as ignorant and afraid.
18. The Apocalypse or the "End of the World" will occur when religion is no longer needed.
19. Thought is the reality, the Physical is the illusion.
20. Being "Human" is the greatest gift there is.
21. All we have is now.
22. The only thing that you can control in this life is yourself.
23. If you can make yourself the best you can be - then the entire world will be a better place for us all.
24. A wise man believes only in lies, trusts only in the absurd, and learns to expect the unexpected.
25. True evil lies in ignorance.
