

The Immortal Within

"The Modern Gnostic Philosophy"

Introduction

Gnostics have traditionally been compilers and interpreters rather than innovators. This work will follow in that tradition. It is intended to be more of a work book than a book of dogma. Further, it has been designed to provide different insights to practicing Gnostics, information to aspiring Gnostics, or a challenge to the unenlightened. Feel free either to read the book from cover to cover or go to only those parts you find relevant to your life.

This book has been developed over approximately thirty-one years. Though it has reached the present level of completion, it must in truth be considered a "work in progress". The reason for this is quite obvious. Gnosis changes from moment to moment, day to day, week to week, and so on. Change is what the Gnostic most admires and holds in deepest reverence. Therefore, if I am to be true to my own Gnosis, this book will change from printing to printing. It will continue to change until the time of my death or until such time as another Gnostic is willing to continue the process.
